?How to add YOUR Project to our Projects Gallery on FabLab Manager ?

Your project is posted in just a few clicks ☐☐

Thank you for being part of our community and inspiring others. ☐☐

You decide how much you want to share – go super detailed, or just add a photo with a short description.

Tip: Add any links that helped you along the way – guides, templates, tutorial videos... whatever made your project easier.

1) Log in ?

[Log in](#) easily with your university account.

Anmelden

2) Navigate to the Projects Gallery

3) Create new project ?

Just click **"Add new project"** and get started!

☐ **Now a form page opens where you can easily add your project.**

Add easily the title, image ☐, details ☐, steps, ... in the middle panel.

☐ *Very important:* Choose the Status, Collaborators and the main Employed machines you used (right-hand panel).

☐ Then click the **"Publish your project"** button.

****The Idea**** ✨

A board game bag for on the go – practical, compact, and personal.

I sewed a bag that fits the game perfectly and makes it easy to take along while traveling. To make it truly unique, I embroidered the outside using our ****Brother embroidery machine****(<https://fablab.tu-ilmenau.de/#/machines/makerspace-ub-stickmaschine-brother-pr-655>). The bag is fully lined on the inside, giving it both structure and a clean finish.

Behind the Scenes - Board Game Bag for on the Go ??

△△△ For a detailed description of the project, see: [Projects Gallery](#) △△△

I love board games.

My friends do too.

And Martin, a former flatmate and friend, shares the same passion.

Since my first semester, we've been playing board games regularly in Ilmenau together with a group of friends. Game nights have become a natural part of our everyday life there.

When Martin's birthday was coming up, I knew I wanted to give him something personal. Of course, a great board game was a must – but since Martin and his wife love to travel, there was one problem: board game boxes are usually bulky and not very travel-friendly.

That's when the idea came up: Why not sew the perfect bag to go with the game?

The Idea ☐

A board game bag for on the go – practical, compact, and personal.

I sewed a bag that fits the game perfectly and makes it easy to take along while traveling. To make it truly unique, I embroidered the outside using our [Brother embroidery machine](#). The bag is fully lined on the inside, giving it both structure and a clean finish.

Since green is Martin's favorite color, the choice was obvious: It had to be green. ☐

Of course, a zipper was essential. I used an endless zipper, which I really enjoy working with because of its flexibility and clean, professional look.

The Result ☐☐

A custom board game bag featuring:

- an embroidered outer layer
 - fabric
 - stabilizer used during embroidery to support the fabric
 - six different embroidery threads
 - a bobbin thread
- a fully lined interior
- an endless zipper

A personal gift – made for board game nights on the go.

Curious about the board game?

Flatiron

Publisher: Pegasus Spiele

Designers: Sheila Santos & Israel Cendrero

A great game, perfectly sized for this bag — although the next version will be just a little bigger, as this one is quite a snug fit.
