

Behind the Scenes - Board Game Bag for on the Go ??

△△△ For a detailed description of the project, see: [Projects Gallery](#) △△△

I love board games.

My friends do too.

And Martin, a former flatmate and friend, shares the same passion.

Since my first semester, we've been playing board games regularly in Ilmenau together with a group of friends. Game nights have become a natural part of our everyday life there.

When Martin's birthday was coming up, I knew I wanted to give him something personal. Of course, a great board game was a must - but since Martin and his wife love to travel, there was one problem: board game boxes are usually bulky and not very travel-friendly.

That's when the idea came up: Why not sew the perfect bag to go with the game?

The Idea ☐

A board game bag for on the go - practical, compact, and personal.

I sewed a bag that fits the game perfectly and makes it easy to take along while traveling. To make it truly unique, I embroidered the outside using our [Brother embroidery machine](#). The bag is fully lined on the inside, giving it both structure and a clean finish.

Since green is Martin's favorite color, the choice was obvious: It had to be green. ☐

Of course, a zipper was essential. I used an endless zipper, which I really enjoy working with because of its flexibility and clean, professional look.

The Result ☐☐

A custom board game bag featuring:

- an embroidered outer layer
 - fabric
 - stabilizer used during embroidery to support the fabric
 - six different embroidery threads
 - a bobbin thread
- a fully lined interior
- an endless zipper

A personal gift - made for board game nights on the go.

Curious about the board game?

Flatiron

Publisher: Pegasus Spiele

Designers: Sheila Santos & Israel Cendrero

A great game, perfectly sized for this bag — although the next version will be just a little bigger, as this one is quite a snug fit.
